Angel Joseph Sanchez Herrera

Full Stack Developer | contact@juseph.dev | (52) 231 162 87 54 | [GitHub](#) | [Web Page](#)

Full Stack Developer with **3 years of experience** in designing and building solutions focused on process automation, operational efficiency, and scalability. Skilled in backend architectures using **.NET** and **Node.js**, and in developing modern web interfaces with **React**, **Next.js**, and **Astro**. Committed to creating maintainable and efficient applications aligned with solid software **design principles**, **scalable architectures**, and business goals.

Experience:

MVP Software Product (Minimum Viable Product)

Developed a gym management software product currently **deployed in 3 locations as an MVP**. The solution streamlines user management, attendance tracking, subscriptions, pricing, inventory, and transactions.

Built with a RESTful **.NET** Web API backend and a **React** frontend, using an API-centric architecture to serve as the gym's operational "brain." Example features include IoT integrations for QR-based parking tickets.

Technologies: **.NET, C#, Entity Framework, PostgreSQL, React, Zustand**

Full Stack E-Commerce Project (Built from Scratch)

Developed a fully custom online store using **Astro** and **React**, integrated with Shopify's Storefront API (GraphQL) for seamless product, cart, and checkout management.

- 100% sales automation, eliminating operational overhead.
- Shopify Storefront API integration (products, cart, checkout).
- Responsive UX/UI design, modular development, and Vercel deployment.

Technologies: **Astro**, **NanoStore**,**TypeScript**, **React**, **Shopify**, **Vercel**
